

Products

**LTS 504 suspended ceiling ventilation unit for supply and exhaust air or circulation air.
Air flow range 0,20-0,80 m³/s, divided into two sizes.**

PERFORMANCE

- Casing made in steel plate with corrosivity class C5.
Inspection hatches made in black plastic-coated sheet metal equipped with lockable knobs.
Insulation 40mm fire-hardy mineral wool.
Housing density class L2.
- Chamber fans with EC motors, protective form IP54.
- Filters with rich filter surfaces, class M5 or F7.
- Built-in electricity central with digital control equipment, which means a large selection of control functions. The control equipment allows connection to computer system through several different data languages.
Hand terminal and webservice is standard.

ACCESSORIES

- Heating battery for electricity or warmwater.
- Cooling battery for cold water or direct expansion.
- Recycling battery
- Damper sealing class 3 with built-in actuator.

Size	Length mm	Width mm	Height mm	Duct dimension mm x mm
